SUMMARY

Full-stack developer with over a year of professional experience building and deploying production web applications using the MERN stack. Builds React front ends with hooks and state management (Redux, Context API, Zustand) and Node.js/Express APIs backed by MongoDB, MySQL and PostgreSQL, deployed on AWS with Docker, Nginx and CI/CD. Has deployed **10+ websites** to production and led the development team at Off The School. Currently building agentic AI features with Claude, Gemini and GPT models as a Software Engineering Intern at **Folio3**.

EXPERIENCE

Software Engineering Intern

08/2026 – 11/2026

Folio3 | Onsite, Karachi

- Developed agentic AI features for the AI Factory and LM Assignment projects, integrating Claude, Gemini and GPT models through their SDKs and OpenRouter.
- Delivered complete end-to-end features across both the frontend and the backend.
- Worked with senior engineers through code reviews and Git-based team workflows.

MERN Stack Developer

05/2025 – 08/2026

Off The School | Karachi

- Led the development team, guiding the delivery of full-stack web projects from build to deployment.
- Built and shipped full-stack web applications with React, Node.js, Express.js, MongoDB and MySQL.
- Designed REST APIs with authentication, role-based access control and database integrations.
- Deployed and maintained production apps on AWS (EC2, S3) using Docker, Nginx and PM2 with CI/CD pipelines, and later migrated hosting to Hostinger.
- Built a complete management system integrated with biometric punch machines, syncing punch data to the backend.

Front-End Developer Intern

03/2024 – 08/2024

NextGenDev & GDSG | Karachi

- **NextGenDev** (07/2024 – 08/2024): built responsive websites with HTML5, CSS3 and JavaScript alongside design and development teams.
- **GDSG** (03/2024 – 04/2024): translated design concepts into responsive, user-friendly interfaces.
